This series brings together a range of articles, extracts from books and reports that inform an understanding of secondary schools in today's educational climate.

After decades of being overlooked, corpus evidence is becoming an important component of the teaching and learning of languages. Above all, the profession needs guidance in the practicalities of using corpora, interpreting the results and applying them to the problems and opportunities of the classroom. This book is intensely practical, written mainly by a new generation of language teachers who are acknowledged experts in central aspects of the discipline. It offers advice on what to do in the classroom, how to cope with teachers' queries about language, what corpora to use including learner corpora and spoken corpora and how to handle the variability of language; it reports on some current research and explains how the access software is constructed, including an opportunity for the practitioner to write small but useful programs; and it takes a look into the future of corpora in language teaching.

\"The emergence and recognition of English used as a Lingua Franca (ELF) offers new opportunities for investigating language change and language contact. This timely volume explores the use of English in an academic context and between speakers from a range of language backgrounds. Data examined from the one-million-word English as a Lingua Franca in Academic Settings (ELFA) corpus provides an in-depth account of how speakers use and shape the language through dialogue in intellectually and verbally demanding situations. Social and cognitive perspectives are offered on the form and function of the language as used in situ, including its phraseology and lexis, the negotiation of topics, and the co-construction of comprehension. Finally, the book discusses the implications of ELF for the language professions and suggests a way ahead for the future of ELF teaching and research. Exploring ELF is essential reading for practitioners and researchers involved in ELF and EAP\"--Provided by publisher.

Discourse analysis is the study of spoken and written language in its social and psychological context. This book explains the relevant theory, and applies it to classroom activities designed to improve students' discourse skills. The teacher is then shown how these activities may be further developed in specific teaching situations.

In this study, Richard Alexander presents a series of original and empirically based case studies of the language and discourse involved in the discussion of environmental and ecological issues. Relying upon a variety of different text types and genres - including company websites, advertisements, press articles, speeches and lectures - Alexander interrogates how in the media, press, corporate and activist circles language is employed to argue for and propagate selected positions on the growing ecological crisis. For example, he asks: How are ecological and environmental concerns articulated in texts? What do we learn about ecological 'problems' through texts from differing sources? What language features accompany ecological discourse in differing contexts and registers? Attention is especially directed at where this discourse comes into contact with business, economic and political concerns.

The volume contains most updated theoretical and empirical research on foreign or second language processes analyzed from the perspective of cognition and affect. It consists of articles devoted to various issued related to such broad topics as gender, literacy, translation or culture, to mention a few. The collection of papers offers a constructive and inspiring insight into a fuller understanding of the interconnection of the language-cognition-affect trichotomy.

The Routledge Handbook of English Language Teaching is the definitive reference volume for post-graduate and advanced undergraduate students of Applied Linguistics, ELT/TESOL, and Language Teacher Education, and for ELT professionals engaged in in-service teacher development and/or undertaking academic study. Progressing from 'broader' contextual issues to a 'narrower' focus on classrooms and classroom discourse, the volume's inter-related themes focus on: ELT in the world: contexts and goals planning and organising ELT: curriculum, resources and settings methods and methodology: perspectives and practices second language learning and learners teaching language: knowledge, skills and pedagogy understanding the language classroom. The Handbook's 39 chapters are written by leading figures in ELT from around the world. Mindful of the diverse pedagogical, institutional and social contexts for ELT, they convincingly present the key issues, areas of debate and dispute, and likely future developments in ELT from an applied linguistics perspective. Throughout the volume, readers are encouraged to develop their own thinking and practice in contextually appropriate ways, assisted by discussion questions and suggestions for further reading that accompany every chapter. Advisory board: Guy Cook, Diane Larsen-Freeman, Amy Tsui, and Steve Walsh

This book focuses on theoretical and descriptive issues and techniques in the study of text and discourse. Drawing on a large number of corpora containing academic language, from spoken language to published research papers, the authors approach their subject from multiple angles: The academic language of biology, literature, philosophy, economics, agriculture, linguistics and applied linguistics. The analysis of intertextual features these papers show leads to penetrating results.
