religion nor modern medical procedures make sense of the personal experience of many who are dying or bereaved. In response, there has been a massive revival of interest in developing new ways of talking about death. This revival, while reinstating some traditional

# File Type PDF Interview With

practices and retaining medical expertise, seeks ultimate authority elsewhere: in the individual self. The new death is personal, facilitated by palliative care, the life-centred funeral, and bereavement counselling. How, though, are people to know how to die and

# File Type PDF Interview With

to grieve? Is the modern self able to make free choices here? What role do professional carers and their theories play in shaping the experiences of people who are dying or bereaved? How do such people learn from each other? To what extent are they influenced by

# File Type PDF Interview With

stereotypical ideas of the good death? Is it possible for the self to be in control when the body has lost control? Can the unique personality of the deceased be incorporated into traditional funeral ritual? This is the first book comprehensively to examine the revival

# File Type PDF Interview With

of death as a subject  
and relate it to  
theories of modernity  
and postmodernity.

The book will interest  
not only social  
scientists but anyone  
learning to care for  
the dying, the dead  
or the bereaved.

The unexpected  
death of Diana,  
Princess of Wales, in

# File Type PDF Interview With

Paris on August 31st 1997 led to a period of mourning over the next week that took the world by surprise. Major institutions - the media, the royal family, the church, the police - for once had no pre-planned script. For the public, this was a story with an ending they had not anticipated. How

# File Type PDF Interview With

did these institutions  
and the public create  
a cultural order in the  
face of such disorder?

Both those involved  
in the mourning and  
those who objected  
to it struggled to  
understand the  
depth and breadth of  
emotion shaking  
Britain and the world.  
Mourning was  
focused on London,

# File Type PDF Interview With

where Diana's body lay, and on Diana's home, Kensington Palace. Throughout the city and especially in Kensington Gardens, millions left shrines to the dead princess made of flowers, messages, teddy bears and other objects. In towns and villages around the

# File Type PDF Interview With

UK, this was repeated. The mourning was also global, with media dominated by Diana's death in scores of countries. The funeral itself had a record-breaking world television audience, and messages of condolence floated around the globe in cyber-space. How

unique was all this?  
Does it mark a shift in  
the culture of  
mourning, of the

position of the  
monarchy, of the role  
of emotion in British  
culture? How does it  
compare with the  
mourning for other  
super-icons - JFK,  
Evita, Elvis, and  
Monroe? Was it  
media-induced

# File Type PDF Interview With

hysteria? Or was it simply a magnification of normal mourning behaviour? Focusing on the extraordinary actions of millions of ordinary people, this book documents what happened and shows how a modern rational society coped with the unexpected in a
