Organized around common rhetorical situations that occur all around us, INVENTING ARGUMENTS shows students that argument is a living process rather than a form to be modeled. The text's focus on invention teaches students to recognize the rhetorical elements of any argumentative situation and apply the tools of argument effectively in their own writing. Students are introduced to the basic layers of argument in early chapters, with material arranged into increasingly sophisticated topics beginning with the most obvious or explicit layers (claims) and moving to the more implied layers of assumptions, values, beliefs, and ideology. By the time they finish Part I, your students will have a thorough understanding of argument, which they can then apply to the invention projects in Chapters 7-12. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

How Puritanism made modern Britain In order to understand the English Revolution and Civil War, it is essential to get a grasp on the nature of Puritanism. In this classic work of social history, Christopher Hill reveals Puritanism as a living faith, one responding to social as well as religious needs. It was a set of beliefs that answered the hopes and fears of yeomen and gentlemen, as well as merchants and artisans, in a time of tribulation and extraordinary turbulence. Over this period, Puritanism was interwoven into daily life. Here Hill looks at how rituals and practices such as oath-taking, the Sabbath, bawdy courts, and poor relief offered a way to bring order to social upheaval. He even offers an explanation for the emergence of the seemingly paradoxical figure of the age—the Puritan revolutionary.

(unseen), \$12.95. Donnelly explicates and defends an account of human rights as universal rights. Considering the competing claims of the universality, particularity, and relativity of human rights, he argues that the historical contingency and particularity of human rights is completely compatible with a conception of human rights as universal moral rights, and thus does not require the acceptance of claims of cultural relativism. The book moves between theoretical argument and historical practice. Rigorous and tightly-reasoned, material and perspectives from many disciplines are incorporated. Paper edition Annotation copyrighted by Book News, Inc., Portland, OR

Describes a method of negotiation that isolates problems, focuses on interests, creates new options, and uses objective criteria to help two parties reach an agreement

Peter Hacker's Insight and Illusion is a thoroughly comprehensive examination of the evolution of Wittgenstein's thought from the Tractatus to his later [mature] phase. This is a reprint of the revised and corrected 1989 edition, with a new foreword by Constantine Sandis. Hacker's book is now widely regarded as the best single volume study covering both the [early] and the [later] Wittgenstein. Until this third edition, the book had been out of print for 25 years.

Comparisons between morality and other [companion] disciplines [such as mathematics, religion, or aesthetics] are commonly used in philosophy, often in the context of arguing for the objectivity of morality. This is known as the [companions in guilt] strategy. It has been the subject of much debate in contemporary ethics and metaethics. This volume, the first full length examination of companions in guilt arguments, comprises an introduction by the editors and a dozen new chapters by leading authors in the field. They examine the methodology of companions in guilt arguments and their use in responding to the moral error theory, as well as specific arguments that take mathematics, epistemic norms, or aesthetics as a [companion], and the use of the companions in guilt strategy to vindicate claims to moral knowledge. Companions in Guilt Arguments in Metaethics is essential reading for advanced students and researchers working in moral theory and metaethics, as well as those in epistemology and philosophy of mathematics concerned with the intersection of these subjects with ethics.
