With this 13th in the series of International Conferences on Fluid Sealing these meetings move into their third decade. To be precise it is now thirty-one years since BHRA, as it then was, convened, with no little trepidation, the first of these Conferences in Ashford, England. The massive set of proceedings now occupies a considerable length of shelf in my bookcase and represents a tremendous technological resource - over 400 separate papers. It is interesting that I seem to refer most often to the earlier volumes, probably most of all to the very first. Perhaps this is because this volume marks the beginning of "historic times", AD 0, for fluid sealing technology. There were of course important publications in this field even before 1961. A notable example is the seminal work of my predecessor at BHRA, Dr D. F. Denny, whose researches on reciprocating fluid power seals, "The sealing mechanism of flexible packings", was published in 1947 by a long since defunct government department, the Ministry of Supply. Another notable source is the Proceedings of the Institution of Mechanical Engineers' 1957 Conference on Lubrication and Wear. However, there is more to fluid sealing technology than just tribology, as we must now call lubrication and wear, interest in static seals has really come to the fore in recent years - witness the large batch of papers dealing with this subject in the present Conference.

Very light, very strong. extremely reliable -aircraft and aerospace engineers are. and have to be. very demanding partners in the materials community. The results of their research and development work is not only crucial for one special area of applications. but can also lead the way to new solutions in many other areas of advanced technology. Springer-Verlag and the undersigned editor are pleased to present in this volume. an overview of the many facets of materials science and technology which have been the objective of intensive and systematic research work during past decades in the laboratories of the German Aerospace Research Establishment. Its contents shows clearly the interrelations between goals defined by the user. fundamentals provided by the scientists and viable solutions developed by the practical engineer. The particular personal touch which has been given to this volume by its authors in dedicating it as a farewell present to Professor Wolfgang Bunk. inspiring

Surely, this truly cooperative endeavour will render a valuable service to a large international community of interested readers, many of them having personal links to the Institute, its director and its staff.

While religious conflict receives plenty of attention, the everyday negotiation of religious diversity does not. Questions of how to accommodate religious minorities and of the limits of tolerance resonate in a variety of contexts and have become central preoccupations for many Western democracies. What might we see if we turned our attention to the positive narratives and success stories of the everyday working out of religious difference? Rather than 'tolerance' and 'accommodation', and through the stories of ordinary people, this book traces deep equality, which is found in the respect, humour, and friendship of seemingly mundane interactions. *Deep Equality in an Era of Religious Diversity* shows that the telling of such stories can create an alternative narrative to that of diversity as a problem to be solved. It explores the non-event, or micro-processes of interaction that constitute the foundation for deep equality and the conditions under which deep equality emerges, exists, and sometimes flourishes. Through a systematic search for and examination of such narratives, Lori G. Beaman demonstrates the possibility of uncovering, revealing, and recovering deep equality—a recovery that is vital to living in an increasingly diverse society. In achieving deep equality, identities are fluid, shifting in importance and structure as social interaction unfolds. Rigid identity imaginings, especially religious identities, block our vision to the complexities of social life and press us into corners that trap us in identities that we often ourselves do not recognize, want, or know how to escape. Although the focus of this study is deep equality and its existence and persistence in relation to religious difference, deep equality is located beyond the realm of religion. Beaman draws from the work of those whose primary focus is not in fact religion, and who are doing their own 'deep equality' work in other domains, illustrating especially why equality matters. By retelling and exploring stories of negotiation it is possible to reshape our social imaginary to better facilitate what works, which varies from place to place and time to time.

This important book, written by educational expert and urban school leader, Tom Payzant, offers a realistic understanding of what urban school leadership looks like from the inside. Payzant shares his first-hand knowledge of the unique managerial, instructional, and political tasks of this role. Effectively combining practical lessons and research, *Urban School Leadership* includes in-depth analysis of various leadership concerns. The book covers topics such as improving student achievement, working with unions, building community, and maintaining and developing resources. Most importantly, it offers stories of real school leaders whose successes and missteps reveal the inherent "messiness" of this difficult job. *Urban School Leadership* is part of the Jossey-Bass Leadership Library in Education series. "This important book provides compelling examples of how effective leaders can have hope, see progress, and achieve success for all children in the schools and districts they lead."—Richard Riley, former United States Secretary of Education "Tom Payzant is one of the few people who could provide such a comprehensive, useful book for educational leaders at all levels. This very practical book is grounded in the important experiences and impressive judgment of one of our nation's most successful school superintendents"—Jon Schnur, co-founder

Urban School Leadership is compelling, crisp, and wise—providing a clear path for those dedicated to improving the trajectory of children's lives."—Timothy F.C. Knowles, executive director, Center for Urban School Improvement, University of Chicago "Urban School Leadership is a must read for anyone interested in the landscape of urban public education in America."—Beverly Hall, superintendent, Atlanta Public Schools

This book explores the recent trend toward the transformation of religious symbols and practices into culture in Western democracies. Analyses of three legal cases involving religion in the public sphere are used to illuminate this trend: a municipal council chamber; a town hall; and town board meetings. Each case involves a different national context—Canada, France and the United States—and each illustrates something interesting about the shape-shifting nature of religion, specifically its flexibility and dexterity in the face of the secular, the religious and the plural. Despite the differences in national contexts, in each instance religion is transformed into culture or heritage by the courts to justify or excuse its presence and to distance the state from the possibility that it is violating legal norms of distance from religion. The cultural practice or symbol is represented as a shared national value or activity. Transforming the ' Other ' into ' Us ' through reconstitution is also possible. Finally, anxiety about the ' Other ' becomes part of the story of rendering religion as culture, resulting in the impugning of anyone who dares to question the putative shared culture. The book will be essential reading for students, academics and policy-makers working in the areas of sociology of religion, religious studies, socio-legal studies, law and public policy, constitutional law, religion and politics, and cultural studies.

Fueled by media reports of gender bias in the schools, the debate over single sex education has been recently renewed. "Voices of Hope" asks for a reconsideration of the framing of that debate. For whom is single sex education better? For the attainment of which goals? What do girls gain by being schooled with male peers? What is lost? In this longitudinal study of more than fifty high school girls at four New England independent schools, Carole B. Shmurak follows their development from ninth grade through the first year of college. Case studies capture the girls' own voices as they describe their hopes for their futures and the events that subsequently affect those futures.

Explains how to get accustomed to the new operating system and master its features, covering topics such as using menus and control panels, networking multiple PCs, and finding lost files.
