Traces the history of earth moving equipment, looks at cable excavators, mining shovels and draglines, walking draglines, and hydraulic backhoes, and discusses the manufacture of large excavation equipment

Fully revised and updated in 2003 to take into account changes in legislation and best practice. Cranes are some of the most widely operated items of plant on construction sites. But, if misused, they can cause serious harm. This guide gives a thorough step-by-step breakdown of the thought processes involved to ensure that a crane remains stable at all times. It gives information on the various factors which you should consider when planning the use on site of both mobile and tower cranes, including type and choice of crane, loading cases, ground conditions and foundation details. Diagrams, symbols, tables and checklists enhance the text throughout. The guide also includes references to other topical material on the subject, while a number of accident case studies, with dramatic photographs, alert readers to the dos and don'ts of crane use.

Ray Lilly is living on borrowed time. He's the driver for Annalise Powliss, a high-ranking member of the Twenty Palace Society, a group of sorcerers devoted to hunting down and executing rogue magicians. But because Ray betrayed her once, Annalise is looking for an excuse to kill him—or let someone else do the job. Unfortunately for both of them, Annalise's next mission goes wrong, leaving her

critically injured. With the little magic he controls, Ray must complete her assignment alone. Not only does he have to stop a sorcerer who's sacrificing dozens of innocent lives in exchange for supernatural power, he must find—and destroy—the source of that inhuman magic. BONUS: This edition contains excerpts from Harry Connolly's *Game of Cages* and *Twenty Palaces*.

In the aftermath of the collapse of the Ottoman Empire, the Kurds were promised their own state. However, several factors meant that this dream never became a reality, and the land of the Kurds was divided. Amid a sense of a loss of identity, the Kurds started to fight for their social and political rights. 'Kurdish Politics in Turkey' argues that the Kurdish struggle has largely been a failure, and that the emergence of the Unions of Communities in Kurdistan (KCK) has been a direct result of this. The book examines the success of the KCK and how it has transformed this Kurdish struggle in Turkey from a one-dimensional political movement, to a multi-dimensional social movement.

Dr. Seuss's classic "Green Eggs and Ham" is now interactive for babies and toddlers--in time to celebrate the 50th anniversary of the original publication. This irresistible board book sports a plastic green egg for little ones to squeeze and spin. Full color.

This widely adopted text explores key theories and models that frame reading

instruction and research. Readers learn why theory matters in designing and implementing high-quality instruction and research; how to critically evaluate the assumptions and beliefs that guide their own work; and what can be gained by looking at reading through multiple theoretical lenses. For each theoretical model, classroom applications are brought to life with engaging vignettes and teacher reflections. Research applications are discussed and illustrated with descriptions of exemplary studies. New to This Edition *Current developments in theory, research, and instructional practices. *Useful pedagogical features in every chapter: framing questions, discussion ideas, and learning activities. *Classroom applications give increased attention to English language learners and technology integration. *Coverage of additional theories (Third Space Theory) and theorists (Bakhtin and Bourdieu).
