Cancer Nursing

About the Cancer Nursing Careers programme. This programme has been developed to provide cancer-specific learning opportunities for registered nurses who provide care to people affected by cancer (PABC) in non-specialist cancer settings including primary, secondary and community services. All nurses, regardless of practice setting, are likely to have contact with PABC and, to enhance their practice, should have an understanding of cancer and its treatment, education in the basic principles ...

NHS England \u2192 Cancer

Accurately diagnosing cancer can take weeks or months. As cancer often develops slowly over several years, waiting for a few weeks will not usually impact on the effectiveness of treatment. The National Institute for Health and Care Excellence (NICE) has produced referral guidelines for suspected cancer.

Cancer Nursing: Principles and Practice

Holland-Frei Cancer Medicine, Ninth Edition, offers a balanced view of the most current knowledge of cancer science and clinical oncology practice. This all-new edition is the consummate reference source for medical oncologists, radiation oncologists, internists, surgical oncologists, and others who treat cancer patients. A translational perspective throughout, integrating cancer biology with cancer management providing an in depth understanding of the disease An emphasis on multidisciplinary, research-driven patient care to improve outcomes and optimal use of all appropriate therapies Cutting-edge coverage of personalized cancer care, including molecular diagnostics and therapeutics Concise, readable, clinically relevant text with algorithms, guidelines and insight into the use of both conventional and novel drugs Includes free access to the Wiley Digital Edition providing search across the book, the full reference list with web links, illustrations and photographs, and post-publication updates

The needs of cancer patients and their families are complex. Yet still more complex are the powerful social and cultural forces that shape the delivery of cancer care, and the way in which it experienced. Cancer Nursing: Care in Context addresses this by adopting a unique approach that situates cancer care in the context of society's attitudes to the disease, and the broader every-day needs of both patients and their carers. By combining evidence-based information, a critical view of care and treatment, and 'first-hand accounts' of having cancer and caring for people with cancer, the book provides a new perspective how best to deliver the care that patients truly require. This second edition includes new chapters on prevention, diagnosis, symptoms, self-help and self-management, and living with cancer long-term. It also: * Addresses significant changes in cancer care, including expansion of nursing roles, the establishment of cancer networks and cancer collaborative projects * Considers NICE guidance on Supportive and Palliative care * Incorporates material on prevention and early detection * Includes evidence tables based on relevant literature Cancer Nursing: Care in Context is an invaluable resource for all those involved in the provision of cancer care and support to patients and their families.

"Nursing Patients with Cancer: Principles and Practice is a major new text: a comprehensive evidence-based source book that provides a detailed foundation for adult cancer nursing. It explains the essential social and scientific basis of modern cancer management, and equips nurses with the key skills and knowledge required to work in cancer care teams. The content is based upon assessment and intervention of patient and family needs, and aims to prepare nurses to work with cancer patients and their families across a range of settings." -back cover.

Cancer Nursing: Principles and Practice, Eighth Edition continues as the gold standard in oncology nursing. With contributions from the foremost experts in the field, it has remained the definitive reference on the rapidly changing science and practice of oncology nursing for more than 25 years. Completely updated and revised to reflect the latest research and developments in the care of patients with cancer, the Eighth Edition includes new chapters on the biology of cancer, sleep disorders, and palliative care across the cancer continuum. The Eighth Edition also includes significant updates to the basic science chapters to reflect recent increases in scientific knowledge, especially relating to genes and cancer. Also heavily revised are the sections devoted to the dynamics of cancer prevention, detection, and diagnosis, as well as treatment, oncologic emergencies, end of life care, and professional and legal issues for oncology nurses.

From the foundations of cancer to issues of survivorship, this book provides all the details and information needed to gain a true understanding of the 'basics' of cancer.

Preceded by Psychosocial nursing care along the cancer continuum / edited by Rose Mary Carroll-Johnson, Linda M. Gorman, Nancy Jo Bush. 2nd ed. c2006.

This book presents a synthesis of important issues, which underpin the practice of advanced cancer nursing and are vital to experienced practitioners in moving cancer nursing forward. The central concerns of the book reflect the emerging roles of the advanced specialist practitioner and include advanced practice, education, management and research. The text is written by recognised cancer nursing experts from throughout Europe who collectively are involved in shaping the future of cancer nursing across the continent.

This is the first book from the UK to take a multidisciplinary approach to care, from screening to rehabilitation. Clinical nurse specialists in breast cancer care, qualified nurses in hospital and general practice and their students will all benefit from this concise text. Physiotherapists, dieticians and counsellors will find all they need to know in this comprehensive overview.
