Shakuntala Devi - Wikipedia

Quotes by Shakuntala Devi “human memory is not merely the repository of information in the brain. It is much more than this, and something that a machine can never be: a power, a force by which we mentally reproduce not just information but also our experiences, by which we shape our perceptions, introspect, interpret and analyse the direction our life has taken.”

Astrology is not a complex science as it is often made out to be and, in the hands of the world-famous 'human computer', Shakuntala Devi, it becomes yet simpler and easier to understand and practise. The present book discusses zodiacs, planets, asterisms, the rising signs, Bhavas, Yogas, Dasas and their effects and transits. It enables the reader to cast a horoscope, and also read one. There are tables of correction for various cities and for sidereal time, Nakshatra divisions and Vimshottari Dasa, Navamsas, etc. It is a complete book that leaves nothing to become an amateur astrologer.

There is a range and richness to numbers. They can come alive, cease to be symbols written on a black board, and lead the reader into a world of intellectual adventure where calculations are thrilling. In *Figuring: The Joy of Numbers*, Shakuntala Devi dramatizes the endless fascination of numbers and their ability to amaze and entertain. She offers easy-to-learn short cuts on how to add long columns in your head, multiply, divide, and find square roots quickly, almost magically. Fractions, decimals, and compound interest become clear and easy to deal with. The author takes delight in working out huge problems mentally, and sometimes even faster than computers. In *Figuring* she shares her secrets with you.

Shakuntala Devi, the Human Computer, explains and simplifies everything you always wanted to know about numbers but was difficult to understand. This book contains all we ever wanted to know about numbers. Divided in three parts, the first will tell you everything about numbers, the second some anecdotes related with numbers and mathematicians, and the third some important tables that will help you always.

Discover the adventure and excitement of mathematical puzzles! Match your wits with the human computer!! Sharpen your intellect, delight your friends and enjoy hours of purposeful entertainment!!! Mathematics is not always hard, mind-boggling stuff. It can also be simple, delightful and interesting. Many famous mathematicians are known to be devoted to peg jumping puzzles. It is perhaps this kind of play that leads to scientific discoveries. The celebrity author, Shakuntala Devi, is regarded as 'authentic heroine of the twentieth century'. She calculates faster than the fastest computer, is listed in the Guinness Book of World Records and continues to amaze audiences around the world with her feats of calculation.

Come to an exciting journey into the Wonderland of Numbers. 'As for numbers, they hate nobody and nobody can afford to hate them,' says Neha's father, who is a supportive parent trying to re-instill confidence in his child. Apart from revealing the specialties of each individual number, from zero to nine, and little mathematical tricks, Shakuntala Devi has underscored another very important aspect. It is up to parents and teachers to ensure that children are initiated into a lifelong love affair with numbers. An engaging child, Neha, suddenly starts lagging in Maths when a new Maths teacher arrives and she starts converting her fear of the teacher into a terror of Maths. Matters touch the nadir when she scores a zero in a test. On the way home that day, she meets with an accident. While her parents and teachers suffer an anxious vigil till she regains consciousness, she travels to the Kingdom of Zero through her sub-conscious mind. In the Wonderland of Numbers is the story of Neha's adventures in the Kingdom of Zero.

Nothing is more important. In today's increasingly complex and technological world the most important thing you can do for your child is to nurture mathability. It is an attitude. Those who say that their child is poor at maths' are doing themselves an injustice. They are undermining the child's future.

Mathability is a skill that teaches a child how to think. Mathability is a skill that develops the inherent intelligence potential. It enhances problem solving abilities and analytical focus. The methods and the techniques are just as suitable for adults as for children. Indeed, many of the methods have altered the mindset even of senior executives and housewives. To something that is often subjected to complexity, confusion, and prejudices, Shakuntala Devi brings clarity, simplicity, and practicality. She corrects many of the generally held misconceptions and effectively demonstrates how mathability is an acquired skill. Nurture Mathability. Nurture Success.

Shakuntala Devi the mathematical genius often called the 'Human Computer' turns her attention to study the highly complex mental equations of a human mind gripped by greed, lust and selfishness. A tense drama of the gradual transformation of a successful lawyer into a scheming killer intent upon committing a Perfect Murder.

In today's increasingly complex and competitive world, the most important thing a parent can do for his/her child is to nurture mathability. Mathability is an attitude. Those who say that their child is poor in maths are doing an injustice to themselves and undermining their child's future. Mathability is a skill that teaches a child how to think. It is a skill that develops the inherent intelligence potential, enhances problem solving abilities and analytical focus. The methods and techniques described herein are as suitable for adults as for children, with several of these having successfully altered the mindset of senior executives and housewives. The author maintains that a child's curiosity and receptivity during infancy and childhood can never be matched, and we must, as parents, nurture the young minds by offering the right learning process and motivation to develop the innate strengths possessed by each child.
